

## City of Delaware

### US 23/Pennsylvania Avenue Interchange PID 80105 Alternative Selected for Further Study

A public information meeting was held by the City of Delaware in October 2008 to present the alternatives for the modification of the US 23 and Pennsylvania Avenue Interchange and to obtain public input for use during subsequent planning activities. Modifications are needed at this interchange to convert it from a partial movement interchange to a full movement interchange.

Based upon the results of the evaluation of alternatives and subsequent public input, the Sandusky Street Extension Alternative is recommended by the City of Delaware and ODOT to be advanced for further study.

The next steps of the project will include Environmental Analysis and Preliminary Engineering.

Any questions regarding the project can be directed to Jessica Ormeroid, P.E., at (740) 203-1724 or email at [jormeroid@delawareohio.net](mailto:jormeroid@delawareohio.net).
