

**For Immediate Release:**

July 25, 2018

## **Winter Street Water Project Starting July 27**

**DELAWARE** – The City of Delaware will undertake a water main replacement project along Winter Street, between Potter Street and Channing Street July 27 through August 14.

Water service interruptions will be necessary and notices will be made 24-hours in advance to residents. After the new water main has been installed and placed into service, pavement and turf restoration will take place.

While every attempt will be made to keep construction disturbance to a minimum, area residents may experience road closures, traffic delays, restricted street parking, and increased noise during regular business hours. Appropriate road closure signage and related traffic control devices will be in place. The City will make every effort to provide 24 hours advance notice of any non-emergency water shut down, but residents may experience short periods of no water service.

Public questions may be directed to the Public Utilities Department, 740-203-1904. Residents also can follow the project on Nextdoor, Twitter and on the city's Facebook page.
