East Side Traffic Study to Look at 20 Intersections

DELAWARE – Beginning Monday, crews will study traffic patterns at 20 east side locations between the Point and downtown Delaware. The analysis area includes William Street, Winter Street and Central Avenue, from Sandusky Street to Ohio 521. This includes 13 signalized intersections and seven un-signalized intersections. Electronic data collection will occur Feb. 22-26 by contractors ms Consultants and Quality Counts. The information will be part of a comprehensive traffic study to be completed by May 2016.
