

For Immediate Release:

April 26, 2016

Annual Water Quality Report Available

DELAWARE – The annual Water Quality Report is viewable on the City’s website delawareohio.net. Printed copies are available at the ground floor City Hall Utility Billing Department. The report, for 2015, is mandated through the Environmental Protection Agency’s Consumer Confidence Rule. It requires public water suppliers to provide annual consumer confidence reports to their customers.

“This report will educate and inform residents about the quality of their drinking water and serve as a way to open communications with our customers,” Public Utilities Director Brad Stanton said.

Those wishing to discuss the city’s water system in more detail can contact Stanton at bstanton@delawareohio.net or 740-203-1900. Residents also are reminded that the Public Works/Public Utilities Committee meets quarterly. Phone City Hall, 740-203-1010, for a schedule of meeting times or visit delawareohio.net.
