

Re-Roofing 440 East William Street, Delaware, Ohio

Addendum #2

- Questions Posed

May 17, 2016

- 1) What's the reason for design built for a roofing project
 - * The City chose a design/build as we are looking for a turnkey roof project in which the contractor can decide the type of roof and installation which needs to be certified by a design professional
- 2) Is the allowance at 15000 or is it 15 percent of your est of 380000
 - * Cannot answer as the question is unclear. Please explain the direction you decide to take in a memorandum in your bid
- 3) I have ask mays consult they where the only ones at your mandatory prebid meeting for a price and as of now they don't have one so how do i get this done since it was mandatory to be at your meeting
 - Only a member of the team had to be present so whatever design professional work with did not need to be present at the pre-bid
- 4) Where did you get your est cost from and where did you get your spec or scope of work from
 - Chief Building Official Jerry Warner
